

Handsmen Threads Project CRM: Elevating the Art of Sophistication in Men's Fashion

Project Overview:

A dynamic organization in fashion industry, a Salesforce designed project to revolutionize the data management, to enhance customer feedback and relations. With the project involving a build of robust data model tailoring to store, and manage all important data, ensured to make an efficient flow of data information throughout the whole organization.

The aspects of the project are consisting of data integrity directly from the user interface. A safeguard for the consistency of data and accuracy of said data, being a crucial part is informed decision making and reliable business operations. This project integrates new process to improve customer service and operational efficiency.

Objective:

This project objective is to implement data integrity, accuracy and consistency, optimized data management and modernized internal operations throughout intelligent automation, simplifying order handling, improve customer relations and feedback and enable proactive inventory control, as well as implementing ease of order confirmations, dynamic loyalty ranking tracking. This project will directly contribute to better customer service and stronger business insights.

Phase 1: Requirement Analysis and Planning

Understanding Business Requirements

Handsmen Threads has several operational gaps; manual customer follow-ups, inconsistent loyal tracking, delayed stock notifications, scattered data storage. This CRM Project addresses these challenges by centralizing data, automating workflows and enforcing data integrity in the UI.

Defining Project Scope and Objectives

- Developing custom data models for Customers, Orders, Inventory and Loyalty Status.
- Automating key business processes; such as order updates and stock alerts.
- Implement UI-based controls and validation for data accuracy.

- Develop scheduled routines for bulk nightly updates.
- Provide complete visibility to admins through tabs.

Data Model and Security Model

Custom Objects:

- Handsmen Customer
- Inventories
- Handsmen Order
- Handsmen Products
- Marketing Campaign

Security Model

- Role Hierarchy

- Profiles: Sales, Inventory, Marketing
- Permission Sets: Permission Platform 1 (for bulk operations)

Stakeholder Mapping

- Sales: For order creation and customer updates
- Inventory: For managing stocks and products
- Marketing: For logging event and customer marketing durations
- Admin: Full Access

Execution Roadmap

1. Requirement Gathering →
2. Data Model Design →
3. Backend Development →
4. UI Configuration →
5. Automation Setup →
6. Testing →
7. Deployment →
8. Documentation

Phase 2: Salesforce Development – Backend & Configuration

Environment Setup & DevOps Workflow

- Sandbox setup for development & testing
- Deployment pipeline using change sets

Custom Objects & Fields

Each object includes custom fields for:

- Customer details
- Purchase totals
- Order amount
- Loyalty status
- Inventory counts
- Emails

Automation Implemented

1. Automated Order Confirmations

A Record-trigger flow triggers upon order confirmation and sends an email to the customer.

Record-Triggered Flow
 Start

Object: **HandsMen Order** [Edit](#)
 Trigger: **A record is created or updated**
 Conditions: **1**
 Optimize for: **Actions and Related Recor...**
[+ Add Scheduled Paths \(Optional\)](#)
[Open Flow Trigger Explorer for Hands...](#)

Run Immediately

+

Send Order Confirmation...
 Email Alert

+

End

Order Confirmation Email Alert

* Label

Send Order Confirmation Email

* API Name ⓘ

Send_Order_Confirmation_Email

Description

Use values from earlier in the flow to set the inputs for the "Order Confirmation E use its outputs later in the flow, store them in variables.

Set Input Values

A₃ * Record ID ⓘ

A₃

Triggering HandsMen_Order_c > Record ID

×

> Show advanced options

2. Dynamic Loyalty Program

A Scheduled-triggered flow recalculates loyalty status based on Total Purchases:

- Bronze (≤ 500)
- Silver (501–1000)
- Gold (1001–5000)

3. Proactive Stock Alerts

A Record-triggered flow checks inventory < 5 and notifies via email.

4. Scheduled Bulk Order Updates

Nightly at 12 AM:

- Updates loyalty rankings

Apex Class and Triggers

- Class for validating bulk operations
- Order Triggers for validation and confirmations

Phase 3: UI/UX Development & Customization

Lightning App Setup

Created a custom app “**HandsMen Threads**” with navigation tabs:

HandsMen Threads HandsMen Customers HandsMen Orders Inventory HandsMen Products Reports Dashboards Accounts Contacts Marketing Campaigns

Page Layouts & Dynamic Forms

- Customer forms show Loyalty Info only when Total Purchases > 500

Phase 4: Data Migration, Testing & Security

Data Loading

- Initial data imported using **Data Import Wizard** for Customers and Products
- Bulk inventory and order history loaded via **Data Loader**

Field History Tracking

Enabled for:

- Customer Loyalty Status
- Total Purchases
- Stock Quantity

Security Configuration

- Profiles for access control
- Role Hierarchy for data visibility
- Permission Sets for elevated privileges
- Organization-Wide Defaults (OWD) configured per object

Test Classes

- Apex test classes for triggers and scheduled and batch jobs

Testing Approach

Each feature was tested with:

- Input screenshots
- Output screenshots

- Error handling checks
- Validation rule behavior
- Flow execution logs

Phase 5: Deployment, Documentation & Maintenance

Deployment Strategy

- Sandbox → User Acceptance Testing → Production
- Change Sets used for migration of flows, objects, fields, and automation
- Pre-deployment & post-deployment checklists followed

Maintenance Plan

- Regular monitoring of automation logs
- Scheduled review of stock alert workflows
- Quarterly enhancements based on business changes

Troubleshooting Approach

- Debug Logs for flow/trigger failures
- Error emails for scheduled jobs
- System audit logs for security issues

Conclusion

The HandsMen Threads Salesforce CRM successfully automates critical business operations, strengthens customer relationships, and provides real-time visibility into orders and inventory. Through data integrity controls, automated loyalty management, proactive stock alerts, and daily bulk updates, the CRM significantly enhances accuracy, reduces manual workload, and improves operational efficiency. The system is scalable, secure, and designed to support future enhancements such as chatbot integration, AI-powered insights, and predictive restocking.
